### Notes:

We individually tailor every liner to your dimensions, so please use our liner order form or our liner booklet "How to measure a Liner Pool" which will give us all the details and dimensions to manufacture your liner to close tolerances – to give you a perfect fit first time.

All Plastica patterns and materials are available in 0.75mm only except where shown. Wall materials can sometimes be used as tilebands. See chart for details.

### Terms & Conditions:

Plastica domestic liners are designed for use in private domestic pools with normal bathing loads, run below 29°C (84°F) only.

Please use the chart shown for the mix and match combinations available.

Please note: Patterned materials cannot be matched along welds. Due to undersizing, liner walls can sometimes run onto floor area and vice-versa so we therefore ask you to ensure the end customer is aware of this.

All our pool liners are manufactured using the best European and American vinyls available. Exacting standards are used in the fabrication techniques in our modern factory. These domestic liners have a 5 year limited guarantee against material and manufacturing defects when used for domestic applications in pools running at temperatures of up to 29° Centigrade (84° Fahrenheit) with chemical and dissolved solid levels within SPATA standards.

Every care is taken to ensure that patterns and colours shown are similar to the product supplied. Plastica cannot accept responsibility for any pattern or colour variation that may occur from batch to batch. Please ask if you require a sample.
