SWIMMING POOL GAS HEATERS

Cost and energy efficient

The range of MB 185/265/405 heaters from Certikin spare you the costly installation of heat sinks because the alumina silica combustion chamber does not retain heat when the heater shuts off: energy smart Certikin heaters consistently achieve high efficiency ratings.

Simply the best

The Certikin MB 185/265/405 heaters with EconoTherm heat exchangers and UniTherm Plus system last longer and deliver more heat to your pool or spa water, per unit of fuel, than any other heaters you can buy.

With many years of experience in designing, engineering, and manufacturing all types of residential and commercial pool, space, and hot water heaters, Certikin's swimming pool gas heaters are simply the best.

MB265 Model

FEATURES

- Electronic Ignition guarantees highly reliable performance
- Strong, weatherproof, powder coated casing suitable for indoor or outdoor installation
- Supplied with prewired 13 amp plug and lead
- Large, clear, accurate, digital pool temperature display
- Suitable for natural or LP gas
- Fully CE approved for most european countries

SWIMMING POOL GAS HEATERS

Your pool is a long term investment that you, your family, and friends will enjoy year after year. Imagine extending your pool season months longer with a pool heater that provides the perfect level of comfort.

Smart function. Smart form.

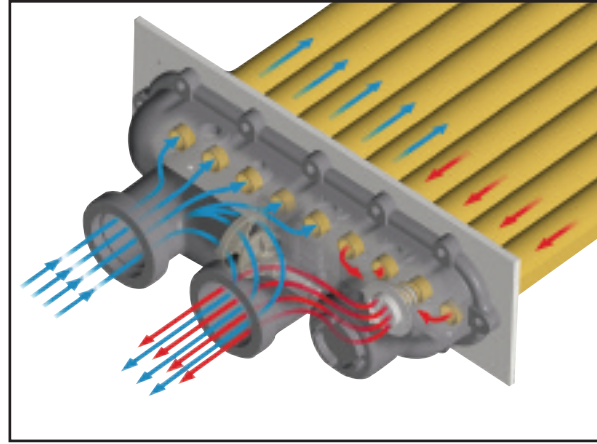

One look will tell you that the Certikin MB range is different. Sleek, contemporary, state-of-the-art, inside and out. The unique venting design and electronic ignition helps to ensure effortless and uninterrupted performance regardless of wind conditions.

Longer lasting tough exterior

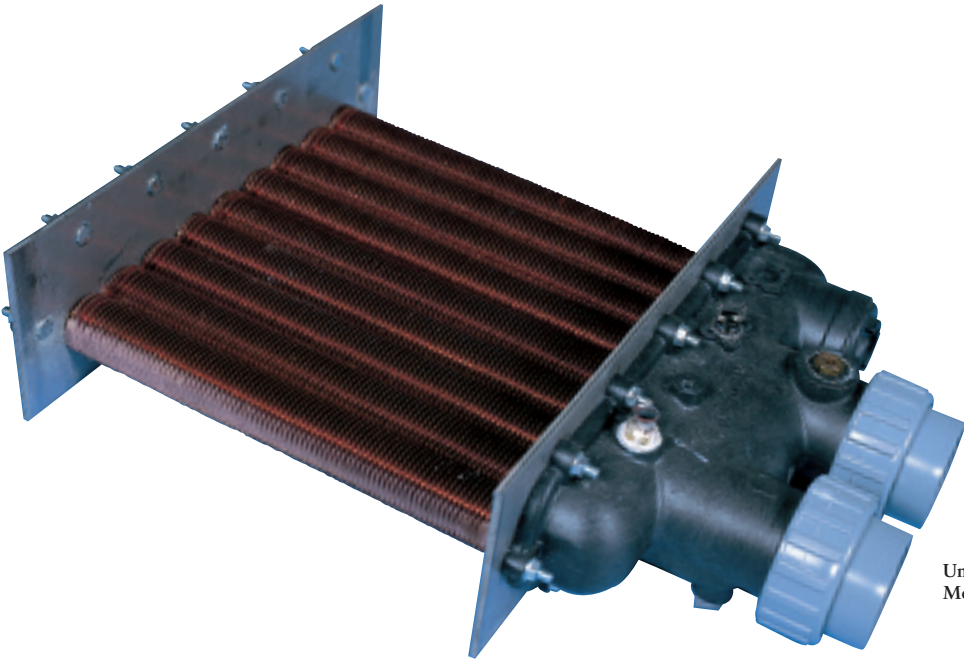

The MB range's exterior polyester coating is a non-polluting material. You can count on a long-lasting, lustrous protective finish that lasts years.

Whatever the weather

Performance and reliability are further enhanced by Certikin's outdoor stackless top designed to keep the MB 185/265/405 operational even in windy conditions and downdraughts.

Pressure sensitive bypass and temperature sensitive throttle valve ensure trouble free operation.

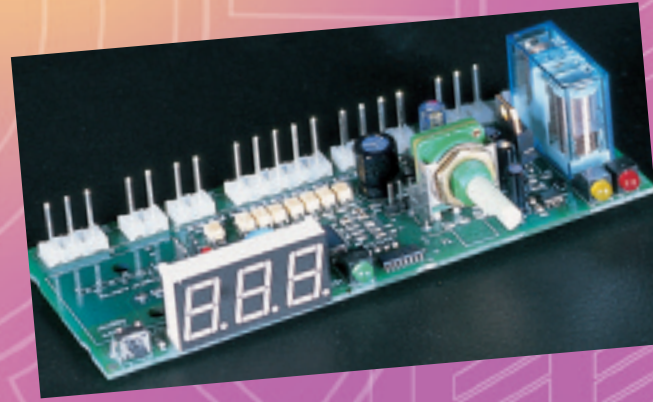

Unique all-copper finned tube heat exchanger. Models 265 and 405 feature Capron headers.

Advanced UniTherm Plus full-flow system improves heater life
Condensation-free operation is assured even with low temperature inlet water. Both water temperature and flow rate inside the heater are controlled to reduce condensation, sooting and scale build-up that can shorten heater life.

EconTherm Heat Exchanger

The MB range is equipped with a unique all-copper finned tube heat exchanger, designed for efficient heat transfer. Models 185, 265 and 405 feature all Capron headers.

Please note: Copper finned heat exchangers are not suitable for use with salt water.

- Large, clear, accurate digital pool temperature display. Solid state control system constantly monitors pressure, flow, temperatures and safety.

- Electronic diagnostics eliminate unnecessary service calls and direct technicians to specific systems during servicing.

A polyester coated protective shell and unique cabinet design ensure uninterrupted performance.

Cast iron header (Model 185 only).
