Salt Cell Protector Plus

What is it?

Lo-Chlor Salt Cell Protector Plus is a complex blend of Magnesium salts, which coats the salt chlorinator cell making it simple and easy to clean. This product is IDEAL for cells using reverse polarity. A clean salt cell will ensure a better production of sanitiser and a cleaner swimming pool.

Who needs it?

- A pool owner who is sanitising his or her pool using a salt chlorinator should use it regularly. It will help make the chlorinator cell easier to clean and assist in extending its life.
- Every serviceman should use it as an essential part of ongoing maintenance programs on salt pools. They should add it at regular intervals when making routine service calls on all pools in this category.

What does it do?

- As well as limiting the build up of calcium scale on salt chlorinator cells, Salt Cell Protector Plus will soften any deposits, making them so much easier to remove.

What advantages does it have over other similar products?

- Does not contain sulphates. Sulphates can attack cement and grout.
- Helps protect marble sheen and Quartzon surfaces from scaling.

Professional tips:

- One treatment will last for approximately 6 months making it an extremely economical product to use.
- Increases chloride concentration in water – enhancing chlorine production.
- 5 litres of Salt Cell Protector Plus will increase water hardness by 100 p.p.m. in a 50,000 litre pool.
- We recommend that every pool owner who is sanitising his or her pool using a salt chlorinator should use our companion product Lo-Chlor Clean Cell Plus on a regular basis.
- Lo-Chlor Clean Cell Plus will remove scale, grime and organic build from salt chlorinator cells.
- Lo-Chlor Clean Cell Plus is superior strength, it won't damage cells, unlike other harsher acid products such as hydrochloric acid, and it is reusable.
