

## Ultra-Spa 4 in 1

200ml's per 1,800 litres of spa water every fortnight

### What is it?

Lo-Chlor Ultra Spa 4 in 1 is made from Chitosan which is derived from crushed crustacean shells. It is a truly natural cationic polymer, 100% bio-degradable and non toxic.

### Who needs it?

- Any spa owner who needs to remove metals, oils or body fats from the water.
- Any spa owner who has a cloudy, unsightly spa.

- Perfect to get rid of all that sun tan lotion which guests may have jumped into the spa wearing.
- It should be used in every newly filled spa.
- It is the ideal product for the spa owner who wants to add sparkle to a dull looking spa.
- Every serviceman should carry it in their vehicle. It will clarify clients' spas both quickly and efficiently with a minimum of effort.
- It can also be used on a regular basis as an integral part of ongoing maintenance programs.

### What does it do?

Ultra Spa 4 in 1 is a unique, fast acting spa clarifying agent which also removes dissolved metals and oils from the water.

### What advantages does it have over other similar products?

- It may be used with all known spa treatments.
- It may be used in all types of spa finishes.
- It is non-toxic and fully bio-degradable.
- By reducing the levels of body fats and oils, it actually enhances sanitiser activity.
- It enhances the filtration cycle, increasing time intervals between backwash cycles.

### Professional tips:

- Unlike conventional flocking agents, this product does not deposit suspended matter on the floor of the spa.
- Matter is kept in suspension in the water and this is termed as "chelating".
- Suspended matter is then filtered from the pool and it accumulates on the filter pads or filter media. This matter is removed when the filter is backwashed.
