

Pool Algaecide

1 Litre treats up to 120,000 litres of pool water

What is it?

Lo-Chlor Pool Algaecide is a long life, copper based, algaecide that will prevent algae growth for up to 3 months.

It was the first product to be manufactured by our company around 25 years ago and, such was the quality of the original formulation, that it has not been altered in any way whatsoever since its inception.

It has achieved acceptance and recognition in both Australia and numerous countries around the world where it is fondly described as "the Aussie algaecide".

Who needs it?

- Every pool owner who wants to prevent algae growth in their pool throughout the entire year.

What does it do?

- Pool Algaecide can be used for eradication and prevention of blue-green, black spot and mustard algae.
- Pool Algaecide will prevent occurrence of algae for up to three months

What advantages does it have over other similar products?

- Unlike other copper algaecides Pool Algaecide utilises a low dose organo copper complex which imparts a copper concentration of 0.26 parts per million. This is considerably lower than other similar products.
- Easy and economical to use.
- Need only be used once every 3 months.
- It may be used in all types of pool finishes .
- Compatible with all recognised sanitisers and other pool additives.
- Effective over a wide pH range.
- Significant clarifying effect.
- Excellent booster for salt water chlorinators.

Professional tips:

- Pool Algaecide **must not be used** in pools using an Ioniser or Natures 2.
- Do not superchlorinate for 48 hours before and after using Pool Algaecide.
- Reduce pH to between 7.00 and 7.2 for best results. At lower pH the waxy coating surrounding algae cells is greatly softened and allows easier penetration by chemicals.
- Regular brushing recommended to assist in algae removal.
- Use in conjunction with Lo-Chlor Starver phosphate remover for very bad pools.
- After algae have been removed always advise your customers to follow up with regular dosing of a Lo-Chlor long life algaecide and Lo-Chlor Starver phosphate remover. This will prevent re-occurrence of algae, and also assist in helping the efficiency of other chemicals in your pool.

Use algaecides safely. Always read the label and product information before use.
