

Monaco Reels

for domestic pools

... the luxury domestic reel system at a realistic price!

Everything about this reel has been carefully thought out, designed, and manufactured to a high quality to make a reel that does the job it is supposed to – wind covers on and off a pool easily. The following features come as standard for all models of Monaco.

Anodised aluminium tube which has extra grooves for optimum strength. This tube will not sag under the weight of a solar cover and is so strong that it can also be used for a semi-commercial reel.

The clamping bar is extra long and round for added strength and both clamping bar and tube are easily adjusted, located and fixed into position by heavy duty allen key bolts.

The unique design of the yoke with its integrated rollers, or “coaster bearings”, makes the operation of the reel extremely easy.

The stands are made from 1 3/4” stainless steel for extra stability.

Because of the strength and stability of the reel, we believe that in most site conditions, deck anchors will not be necessary.

The special reinforced ends, or “feet”, are adjustable for uneven paving and castors can be retro-fitted at any time.

Monaco Reels

models & fixings

Standard:

All features as described
Standard 3 spoke steering wheel

Deluxe:

All features as described
Stylish, marine standard,
deluxe steering wheel

Premier:

All features as described
Stylish, marine standard,
