

System Features

- Systems are designed for quick assembly and precise alignment of components
- Pumps and filters are performance-matched to provide maximum flow and energy efficiency
- Filter bases are molded of PP for long-lasting performance
- 7-position valve provides maximum flow at low pressure drop

Filter Valve Functions

BACKWASH – For cleaning filter sand bed of accumulated debris

RINSE – Use after completing backwash cycle to ensure all dirty water is rinsed out of the filter to waste

WASTE – By-passes the filter for draining or lowering pool water level and for vacuuming heavy debris directly to waste line

RECIRCULATE – Water is recirculate through the valve, by-passing the filter.

CLOSED – Shuts off the flow from the pump to the filter

FILTER – For normal filtering and regular vacuuming

WINTER – For winterizing
